

Risk and Compliance Intelligence Hub

Turning regulatory complexity into compliance intelligence

Together, Cognizant and Squirro empower financial institutions to connect regulatory change to internal controls, implementation actions, audit evidence and board reporting in real time.

The challenge

Today's financial institutions face:

Weeks-long regulatory impact assessments and time-consuming compliance response

Weak audit readiness with often untraceable, unexplainable AI outputs

Wide gaps between regulatory change and internal policy update

Manual, error-prone compliance and remediation activities

Elevated operational and compliance risk

Our solution

The Risk and Compliance Intelligence Hub from Cognizant and Squirro provides financial institutions with a managed, intelligence-driven compliance capability, with:

Deep expertise

Combines Squirro's Enterprise retrieval and knowledge capabilities with Cognizant's deep regulatory, risk, and transformation expertise to drive business outcomes at scale

Intelligence to execution

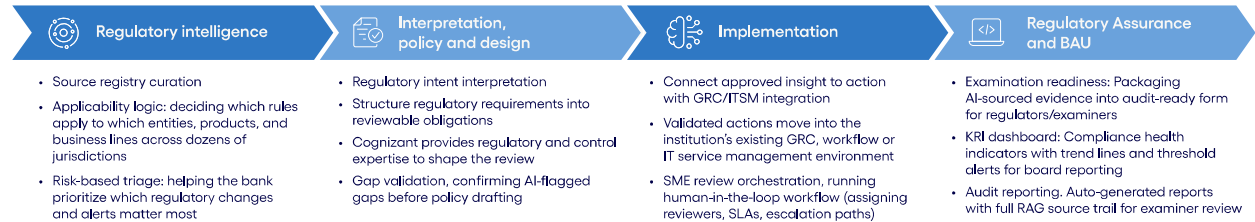

Transforms insights into action by automating compliance workflows, strengthening controls, accelerating remediation, and enabling proactive risk management

Trusted AI

Similar solution already deployed at IDB Invest, Security Benefit, Candriam and Deutsche Bundesbank, and proven in the most demanding supervisory environments

How it works

The Risk and Compliance Intelligence Hub deploys a 4-stage process that encompasses the following:

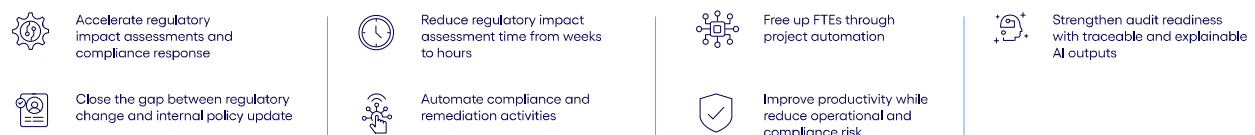

Key capabilities

The Risk and Compliance Intelligence Hub is a secure, auditable, AI-powered intelligence layer that sits above a bank/insurer's compliance & risk content landscape, to enable:

Capabilities	What it delivers
Unified discovery	Across policies, procedures, audit findings, risk events, incidents, regulatory circulars, controls evidence, etc.
Grounded Q and A / summarization	With traceable citations to source artifacts (RAG patterns and retriever-first approach)
Deterministic, domain-aware retrieval	Using knowledge graphs/GraphRAG to reduce hallucinations and improve precision for regulated use cases
Downstream orchestration	In which validated actions move into the institution's existing GRC, workflow or IT service management environment

Business outcomes

By connecting regulatory change to internal controls, implementation actions, audit evidence, and board reporting in real time, the Risk and Compliance Intelligence Hub helps financial institutions:

Why Cognizant?

A strategic partner to turn today's challenges into tomorrow's possibilities.

- Industry expertise
- Technology & engineering
- AI & automation
- Data & cloud modernization
- Ecosystem partnerships
