

Risk Insights for Risk Managers

Keep your business safe

Working in risk management has become one of the most important and most exposed roles within an organization. There is an enormous variety of risks facing a business and the threat posed by these risks can be incredibly damaging. Take, for example, financial penalties for failing to meet regulatory compliance requirements or brand damage caused by a product recall.

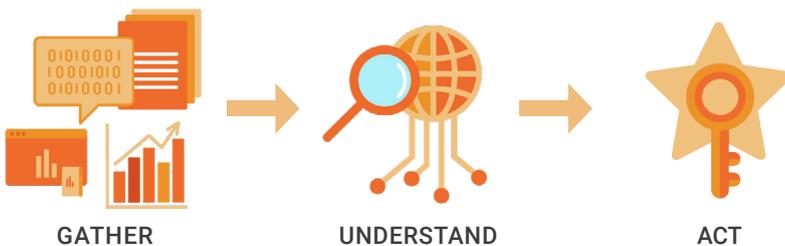

WHAT'S IN IT FOR YOU?

Recognizing emerging risks early, staying on top of an evolving risk landscape, and developing strategies to limit its impact on the organization is, therefore, a key element of a risk professional's job.

Every time a new event emerges that might affect risk in some way, the user will be notified in real-time. Each application has a 360° risk cockpit, which holds all the required data. This can be filtered and presented according to the user's preference, with real-time access to the information they need to reduce the risk, updating the board on levels of risk, and making insights-driven decisions.

HOW IT WORKS

Squirro Risk Insights is a suite of augmented intelligence solutions that are designed to make a risk professional's life easier and make their work more effective.

They work by monitoring data sources all over the world (social media updates, breaking news...), looking for events that could signify a new or evolving risk to the organization, then reporting that information back to the risk professional.

CHALLENGES

- Struggling to make sense of all the data relating to business risk?
- Unable to respond quickly enough to breaking or changing risk events?
- Concerned that regulatory compliance requirements are not being met?
- Demands from the business about the level of risk-taking too much time?

KEY FACTS

- Provides a more informed and strategic view of all risk
- React in real-time to emerging risks facing the business
- Peace of mind that risks are assessed, managed, and mitigated effectively
- Helps you keep the C-suite informed of any upcoming risk
- Simple to manage for any user

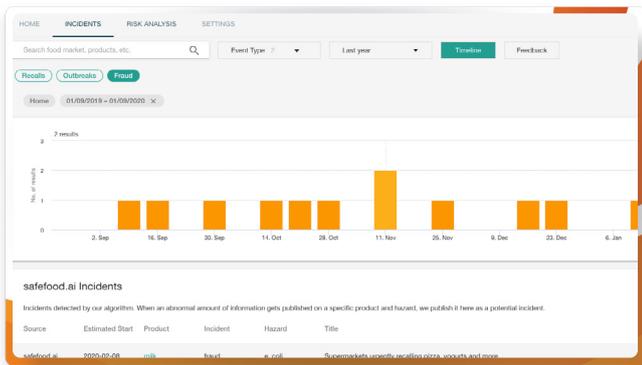

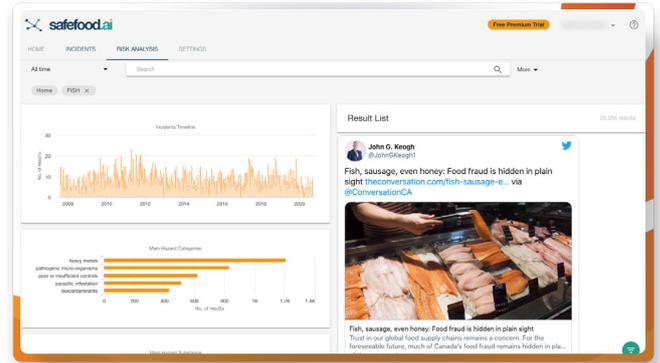

RISK INSIGHTS SUITE

- GDPR
- Credit Risk Monitoring
- Supply Chain Monitoring

EXPLORE
Risk Insights

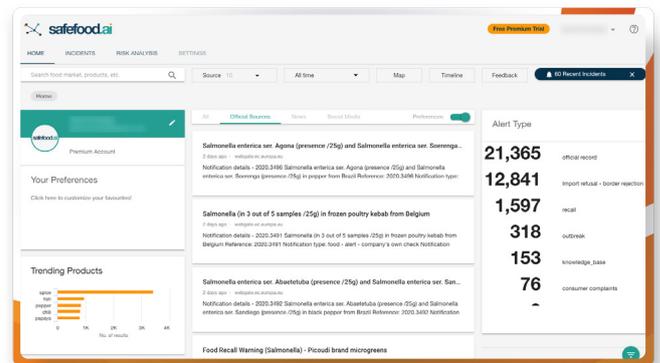

1 AN EARLY WARNING SYSTEM

Using Augmented Intelligence, the Squirro Risk Insights solutions combine thousands of data sources - from social media and manufacturers' product recalls to government websites - to deliver real-time updates on risks alerts that threaten your business.

2 EVALUATE RISK, MITIGATE EXPOSURE AND HEIGHTEN EFFICIENCY

Guard the huge, inter-connected manufacturing supply chain by monitoring thousands of data sources - structured and unstructured, internal and external.

3 BESPOKE CLIENT COCKPIT

The client cockpit is designed for business users, not data scientists. These customizable dashboards present personalized, relevant information in a user-friendly format for day-to-day front-line use.
